DETAIL

Figure 1: High voltage test setup

The high voltage test setup is used to measure the breakdown voltage of the device. The device is placed in a metal fixture and connected to a high voltage source. The voltage is increased until the device breaks down, and the breakdown voltage is recorded. The breakdown voltage is a function of the device geometry and the material properties of the device.

Figure 2: High voltage test setup

The high voltage test setup is used to measure the breakdown voltage of the device. The device is placed in a metal fixture and connected to a high voltage source. The voltage is increased until the device breaks down, and the breakdown voltage is recorded. The breakdown voltage is a function of the device geometry and the material properties of the device.
