PLC 控制：

Designing a solution for a customer's needs is a complex process. It involves understanding the customer's requirements, conducting research, and developing a detailed design. The design process is iterative, meaning that the design is refined through multiple cycles of testing and feedback. Once the design is finalized, the next step is to manufacture the parts and assemble the machine. This process involves sourcing materials, machining parts, and assembling the machine components. Finally, the machine is tested and commissioned, and the customer is provided with training and support.

**COMPANY PROFILE**

DESSION is a modern packaging equipment solution provider integrating R&D, production and sales. Since the establishment of the company, with the continuous exploration, research and application of advanced technology, the company's development has begun Scale, with an innovative team of professional and technical personnel, engineers, sales and after-sales service personnel, has successfully developed a number of series of packaging machinery and related equipment, widely it is used in food, medical supplies, hotel supplies, daily necessities, hardware accessories, cultural and sports goods, toys and other products that require flexible packaging. With advanced engineering design technology and high-quality equipment system, the equipment is out The mouth has reached the Middle East, Southeast Asia, Europe, America, South Africa and other countries and regions, and has been well received by users all over the world.
