

# Automatic Disposable Syringe Flow Wrapping Packing Machine factory

德迅 *Dession*

< **INTRODUCE** >

The Syringe Flow Wrapping Packing Machine, Model DS-350X, is a

cutting-edge packaging solution offered by Foshan Dession Packaging Machinery Co., Ltd. This high-tech machine is designed for efficiency, versatility, and precision in packaging syringes across various industries. With a focus on meeting the diverse needs of customers, the DS-350X ensures superior performance in packaging processes, ranging from material transportation and coding to sealing, cutting, and final product output. Its innovative features make it an ideal choice for applications in the food, beverage, medical, and chemical industries.

## < APPLICATION SCENARIOS >

## < MACHINE ADVANTAGES >

**304 Stainless Steel Construction:** The equipment rack's contact material is made of 304 stainless steel, ensuring compliance with food safety standards (QS).

**Safety Protection:** Equipped with a comprehensive safety protection

system that adheres to enterprise safety management requirements, prioritizing user safety.

**Independent Temperature Control:** The machine features an independent temperature control system, guaranteeing accurate temperature control for beautiful and flat sealings.

**Servo Control Technology:** Utilizing servo control for horizontal sealing, vertical sealing, and feeding, the machine ensures precise control, high reliability, and intelligent operation, contributing to high-speed and efficient packaging.

**User-Friendly Touch Screen Interface:** The touch screen interface allows the storage of various packaging process parameters for different products. This feature enables easy product transitions without the need for constant adjustments.

**Fault Display System:** The machinery incorporates a fault display system, facilitating timely fault resolution and reducing the reliance on manual intervention, enhancing operational efficiency.

**Complete Packaging Process:** From material transportation and coding to bag making, sealing, cutting, and finished product output, the machine provides an all-encompassing solution for the entire packaging process.

**Customizable Bag Shapes:** The machine can be configured to produce pillow-shaped bags or other customized bag shapes based on specific customer requirements.

## < MACHINE DETAIL MARKINGS >

< **DETAIL** >

### **Customized bag maker**

Fold and roll the film through the metal panels on both sides to form a bag shape

### **High sensitivity cursor eye**

Using a high sensitivity cursor electric eye to accurately track the color blocks of the roll film,

effectively preventing deviation  
during the roll film process

### **Hot press sealing area**

Independent PID temperature control, heating double sided rotary sealing, sealing the back of packaged products to ensure sealing

### **End seal cutting area**

Rotate the constant temperature heat sealing cutter to seal the front and rear ends of the packaged product to avoid curling or loopholes in the sealing position
