[DETAIL](#)

### Liquid Feeder

Suitable for packing thinner liquid like water, milk, oil, juice, etc.

Suitable for packing sticky liquid like sauce, jam, ointment, etc.

### U-shaped stirring drum

Suitable for packing thick, granular sauces, such as peanut butter, heated and stirred to homogenize the sauce, usually used with a high pressure tube.

### Code printer

For small bag prefab bag packers, sometimes the prefab bag is too short, such as less than 15cm, to use a ribbon date printer, in which case our embossing date printer can be used.

### GRAB BAG

Put the bags neatly into the bags (200-300 bags), if the special bags (such as bags with suction nozzle), it needs to complete the operation with the conveyor belt

### CLIP BAG

The bag clamping device will clip the bag from bottom to top in the bag slot, and then clip it to the coding machine for the date coding of the bag

### DATE PRINTER

The code printer carries out date coding on the bag. The code printer contains Arabic characters. If special characters are needed, special characters should be customized

### OPEN THE BAG

Bag opening device through the air pressure pump device, so that the suction cup automatically hold the bag, so as to complete the bag opening operation process

### FILLING

The machine has 3 servo motors built-in, automatic induction bag, no bag filling, accurate feeding, packing precision error is less than  $\pm 0.5-2G$

### SEALING BAG

Bag sealing device uses sealing rod for heat sealing, sealing temperature :100 ~ 190°C, special products may need secondary sealing
