

## Fully sealed capping packaging aluminum can capping machine in stock

德迅 **Dession**

< **INTRODUCE** >

This machine is equipped with electromagnetic clutch and

electromagnetic brake. With the logic circuit electrical design, it can automatically identify normal or fault conditions, and only allows cans and lids to pass through the rolling sealing mechanism smoothly. Multi-layer safety protection devices ensure safe operation of the equipment.

## < APPLICATION SCENARIOS >

Tinplate can

PET can

Plastic jar

Aluminum can

Paper can

Tin can

## < MACHINE ADVANTAGES >

1. Small size, light weight, can be used in elevators, no site restrictions
2. 220V power supply, low voltage requirement
3. Innovative integrated mold design, the machine can be customized according to the product shape
4. Imported high-grade electrical and gas components, low failure rate, stable and durable machinery
5. The optional printing system is a single separation system and can be matched according to production requirements.
6. There are two modes: manual and automatic operation.
7. The mechanical structure is made of stainless steel and aluminum alloy with anti-rust treatment to meet food hygiene requirements.
8. The outer cover and main parts of this machine are made of 304# stainless steel

## < DETAIL >

## Control Panel

It can be used right after booting, quickly set parameters, supports multiple languages, and is simple and convenient to operate.

## Sealing wheel

It adopts a double sealing wheel design, made of chromium steel, with high hardness, rust-proof and durable, making the sealing effect more perfect and the sealing degree high.

## Miniaturized design

It is suitable for small enterprises or family workshops, and is also an ideal equipment for proofing and backup of medium and large enterprises.

## The can does not rotate

The tank does not rotate during the sealing process, and the sealing hob rotates to complete the sealing, which is reliable and safe and prevents materials from being thrown out.
