

High speed automatic medical disposable syringe packing machine price

德迅 **Dession**

< **INTRODUCE** >

The DS-350X is an automatic medical disposable syringe packing machine

designed and manufactured by Foshan Dession Packaging Machinery Co., Ltd. With a focus on versatility, the machine is capable of efficiently packaging medical disposable syringes, meeting the stringent requirements of the healthcare industry.

< APPLICATION SCENARIOS >

< MACHINE ADVANTAGES >

Hygienic Design: The equipment rack's contact material parts are constructed from 304 stainless steel, ensuring compliance with food safety standards (QS) and maintaining a hygienic packaging environment.

Safety Features: Equipped with comprehensive safety protections in line with enterprise safety management requirements, providing a secure operating environment for both users and the packaged products.

Temperature Control Precision: Independent temperature control system ensures accurate temperature regulation, contributing to the creation of consistently beautiful and flat seals on the packaging.

Servo Control Technology: Utilizes servo control for horizontal sealing, vertical sealing, and feeding, providing independent motor control, PLC control, and touch screen control. This ensures high reliability, intelligence, and efficiency in the packaging process.

Customizable Packaging: The touch screen interface allows users to store various packaging parameters for different products. This feature facilitates quick and easy adjustments when switching between different syringe products, enhancing overall operational efficiency.

Fault Display System: The machinery is equipped with a fault display system, enabling timely identification and resolution of issues. This reduces the need for manual intervention, streamlining the packaging process.

Complete Packaging Solution: From material transportation and

coding to bag making, sealing, cutting, and finished product output, the machine offers an all-encompassing solution for the entire packaging process.

Versatility: Capable of producing pillow-shaped bags or other customized bag types to meet specific customer requirements, adding flexibility to the packaging options.

DETAIL

Customized bag maker

Fold and roll the film through the metal panels on both sides to form a bag shape

High sensitivity cursor eye

Using a high sensitivity cursor electric eye to accurately track the color blocks of the roll film, effectively preventing deviation during the roll film process

Hot press sealing area

Independent PID temperature control, heating double sided rotary sealing, sealing the back of packaged products to ensure sealing

End seal cutting area

Rotate the constant temperature

heat sealing cutter to seal the front
and rear ends of the packaged
product to avoid curling or
loopholes in the sealing position
