< MACHINE DETAIL MARKINGS >

DETAIL

Film loader

Servo film-pulling and film-loading assembly, with the dancing arm moving up and down, realizing dynamic control of the film tension. The film travels above the eye-mark sensor, realizing precise film tracking and positioning.

Bag former

Drawn down by servo drive friction

pull-down belt, packing film enters the bag former, realizing nice and neat packaging performance. With a user-friendly design, changing the bag former for different film widths is easy.

End sealing assembly

With independent temperature control, the servo control end sealing jaws move in open-close motion. Heated sealing jaws will simultaneously make the top seal of one bag and the bottom seal of the next bag. Then, the Finished pillow bag will be discharged.

Intuitive HMI display

Different settings for set up, commissioning, daily operation and maintenance can be conducted via the touch screen. With the memory function, it is easy for different packing sizes to change over.

First you use the machine and any thing you need you can ask me

Thanks

Service praise

My pleasure , it's happy to get your good feedback on the machine

1 条未读信息

It's good And your service is excellent Your Boss must give increase

Quality praise

成 Neal 美国单工位预制袋混合沙

Hello Joe - the machine continues to run better every day. We're hoping that all the parts do not start to break with use.

If anything breaks (like the heating bar), can you send up replacement parts?
