

1. Ultrasonic system is divided into three parts, ultrasonic generator, ultrasonic transducer and ultrasonic die, with the three parts is a complete ultrasound system.
2. The ultrasonic generator is also a part of the ultrasonic energy production, our ultrasonic generator adopts imported electronic components, hardcover.
3. With a high-powered ultrasonic transducer with a titanium alloy ultrasonic die head.
4. The machine failure rate is low, consumables, durable, easy installation and debugging, maintenance is simple..
