

1. The first step is to identify the product and its packaging requirements. This involves understanding the product's characteristics, such as its weight, volume, and fragility, and determining the appropriate packaging materials and methods.

2. The second step is to select the appropriate packaging materials. This includes choosing the right type of container, such as a box, bag, or bottle, and selecting the appropriate filling material, such as bubble wrap, foam, or packing peanuts.

3. The third step is to design the packaging. This involves creating a layout for the product and its packaging materials, ensuring that the product is protected and the packaging is easy to open. This step also includes labeling the packaging with the product name and other relevant information.

Shisha Tobacco Materail

Plastic Bag Packing

Bag Into Box

Doypack Pouch

Cellophane & Tear Line Wrap

Big Box

Bottle Packing

4. The final step is to test the packaging. This involves simulating the shipping process to ensure that the product is protected and the packaging is easy to open.
